DETAILED ACTION

This Office Action is in response to the Amendment filed on December 15, 2004 and the IDS filed on December 20, 2004. Claims 1 and 5-8 were amended.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: None of the cited prior art alone or in combination teaches the claimed combination of a method for controlling peak firing pressure and turbine inlet temperature in a turbocharged diesel engine including the steps of:

"controlling the bypass valve to divert a sufficient portion of compressed air from a compressor outlet around the engine to maintain at least one of the peak firing pressure and the turbine inlet temperature within maximum allowable values, after transmitted values of the turbine inlet temperature and the peak firing pressure were to be compared with allowable maximums of these values stored in the BVCU"

Conclusion

The IDS (PTO-1449) filed on December 20, 2004 has been considered. An initialized copy is attached hereto.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
